LATER
FROM EUROPE.

Special Dispatches to the Whig & Courier
August 21, 1861

The fifteenth goes in the Great Republic from
Portland, on Tuesday next. The celebration of
Washington's birthday was a complete success.
Speeches were made by the Governor, Hon. Jos.
Granger, Peters and Blake. The Astorians
Colors were presented to the fifteenth anniversary.
McCallis never did better.

FROM WASHINGTON
Destruction of Torpedoes on the
Savannah River.

Beauregard Sick at Nashville.

Great Fire at Augusta, Me.

WASHINGTON, 21st.
Despatches have been received at the Navy
Department from Flag Officer Dupont dated
Port Royal, Feb. 18th, enclosing a report from
Com. Rodgers, in which he says that while
sounding in the Savannah River a short distance
above the mouth of Wright river, he discovered
several objects floating on the surface, which at
first appeared to be empty tin cans, as he was
not regarded by him as worthy of the name of
Lieut. Spots. He then ordered the boats to be
sent out to the objects, and they were found to
be torpedoes. The objects were found to be
torpedoes. The objects were found to be
torpedoes. The objects were found to be
torpedoes.

Two Days
LATER FROM EUROPE.

England Again Allows the Export of Munitions
OF WAR.

The Royal Mail steamship Niagara, from Liverpool
arrived 8th, via Queenstown, 10th, and is expected
to have 40 passengers for Boston, but no space
has been reserved for her.

Great Britain.
The sale of Parliamentary papers concerning
the American civil war, &c., have been laid before
Parliament.

Not fewer than 45 official communications
passed about the Nashville and Louisville to
January, 1862.

Lord Russell instructed Lord Lyons, in case of
his advice being asked by Mr. Lincoln's Cabinet,
to reply that Mr. Lincoln's Government
will decline giving it unless both parties apply
for counsel.

The policy of the French government in February,
1862, in the event of Mr. Lincoln raising
the question with Great Britain, is laid down in
the following terms:

Her Majesty's Government would, in the first
place, be very desirous to see the war show
by itself, and not by the aid of foreign troops,
and only with the United States, but they would
take care to let that government which
multiplied provocations and sought for
quarrels, understand that their forbearance
sprang from considerations of strength, not from
timidity or weakness.

Lord Russell repeats the substance of the con-
versation had with Lyons, and that the
delegates who waited upon him to urge the
recognition of the Confederation. The answer to
these gentlemen was, that England would
never admit such a reality.

Lord Russell said Her Majesty cannot as
knowledge the independence of nine States until
the fort of arms or a more peaceful mode of
negotiation shall have more clearly determined
the respective positions of the belligerents.

There is a short note written as late as the
20th of December, which shows that even the
British Ministry believed in the probability of a
war with the United States. Lord Lyons is di-
rected to speak with Mr. Seward on the subject
of letters of marque, and to say that in case of
war Great Britain was willing to abstain from
privateering, and to leave the two countries to
conduct the war in a similar engagement, on the
part of the United States.

The London journals generally regard the
Queen's speech as a negative, and so far a satis-
factory result.

The Morning Herald (opposition) has scarcely
a remark to offer on that ministerial pro-
gramme, and says it is difficult to form a blank
page.

The session opened calmly, and with no show
of opposition, and indications were that the ses-
sion would be a quiet one.

The Globe, however, admits that Parliament
is about equally divided, and that the Conserva-
tives might, if they chose, bring about serious
complications. It intimates that, in the event
of a defeat, Lord Palmerston would dissolve
Parliament, and appeal to the country.

The Prince of Wales has left England for
the Continent, en route for the East. He travels
in strict incognito.

In the House of Lords on the 7th, Earl Car-
rington inquired as to the truth of the current
report of a Canadian visit to the Earl of
Sheffield, or of Mr. Seward. He, the Earl,
answered severely on the subject of the United
States if facts were correctly reported, and espe-
cially on the demand that Sheffield should take
the oath of allegiance to the United States as a
condition of his release.

Earl Russell, who was all but insoluble, was
naturally reported, but as soon as Lord
Lyons was informed of it he applied to Mr. Sear-
d, who stated that the oath of allegiance was
not a condition of his release, but a condition
of his release.

The Southern States
The President's government claimed that in an
extraordinary emergency like the present, the
President must be invested with extraordinary
powers, extending to foreign residents as well
as American citizens.

Mr. May's Government entered strong re-
monstrances against this, and there was no ob-
jection to produce the correspondence.

The House of Commons, on the 7th, Mr.
Gregory was refrained on the previous evening
from addressing the House as he addressed
the Queen was being discussed. He said he
thought it undesirable to introduce topics which
might give rise to a debate. But he felt that
the blockade of the Southern ports by the Fed-
eral government was wholly inadvisable, and
supply a blockade upon paper. Upon a future
occasion, he believed it should be in a position
to show that the character of the blockade was
right, in justice to both belligerents, it
ought to be reserved for discussion at the hands
of the government.

Mr. G. P. Bonick expressed satisfaction at
Mr. Gregory's announcement to bring the ques-
tion of the blockade before the House. His own
opinion was that the recognition of the paper
blockade would be a violation of the rules of
the House, and it was the duty of the
country to consider seriously the condition in
which we were placed.

Late Gibraltar affairs referred in Liverpool
report the printer's Stated detained at Gibraltar
from the difficulty of obtaining coal. At a
meeting of persons connected with the sailing
of the ship, it was decided to send a party
to the island, to see what could be done, and
to supply coal to the ship, and to supply coal
to the ship, and to supply coal to the ship.

The same advice was that the crew of the
Sumpter are true fellows, but natural men say
the ship has no fight in her.

The Union in an editorial on the position of
America, says that the last time the
Americans have been constrained to spend more
money in a shorter time and to less purpose than
any people who ever lived on the face of the
earth, and that is all that is a literally been
during this period. It then proceeds to argue
that the subjugation of the South and a future
Union are impossible.

The new Canadian screw warship China has ar-
rived at Liverpool, and will take her place in the
line for New York on the 1st of March.

Bangor and Boston
Despatch Line.

Mr. FRANCIS J. CUMMINGS is now
loading at Waterbury, and will sail in two
weeks for Bangor, and will call at Bangor on

SCIENTIFIC AMERICAN
—THE—
Best Mechanical Paper in the World
SEVENTEENTH YEAR
VOLUME VI—NEW SERIES
A NEW VOLUME of the first of our series
per commences on the 1st of July
published weekly and every number
contains pages of useful information
ten original engravings of new
covers all of which are prepared
columns

To the Mechanic and Manufacturer
No person engaged in any of the
manufacturing pursuits should
go without the SCIENTIFIC AMERICAN
four cents per week every number
six to ten engravings of new in-
ventions which cannot be found in
any other publication. It is an estab-
lished rule to insert none but original en-
gravings of the first class in the art drawn
and prepared by persons un-
der the
To the Inventor
The SCIENTIFIC AMERICAN is
the only publication in which
every inventor as it not only costs
nothing to have his invention
described in the SCIENTIFIC AMERICAN
but he also receives a copy of the
issue in which his invention is
described. The SCIENTIFIC AMERICAN
is the only publication in which
the inventor can have his invention
described in the SCIENTIFIC AMERICAN
and receive a copy of the issue in
which his invention is described.

A second actual reduction
 in the normal distribution
 of the concentration of
 blood is due to the
 lower quality of the
 oxygen of the blood in
 the lungs. Diseases of the
 lungs, such as emphysema
 and bronchitis, can
 cause a decrease in the
 amount of oxygen in the
 blood. This is a serious
 condition, and it is
 important to treat it
 properly. The treatment
 is to increase the
 amount of oxygen in the
 blood. This can be
 done by using oxygen
 therapy, which involves
 breathing in pure oxygen
 through a mask or a
 tube. This helps to
 increase the amount of
 oxygen in the blood, and
 it can help to improve
 the patient's condition.
 Another way to treat
 this condition is by
 using a device called a
 hyperbaric chamber.
 This is a chamber that
 is filled with pure
 oxygen at a pressure
 higher than the normal
 atmospheric pressure.
 The patient is placed
 inside the chamber, and
 the pressure is increased.
 This helps to increase
 the amount of oxygen
 in the blood, and it can
 help to improve the
 patient's condition.
 It is important to
 consult with a doctor
 if you have any
 symptoms of this
 condition, such as
 shortness of breath,
 fatigue, or a bluish
 tint to the lips or
 fingers. Early treatment
 can help to prevent
 complications and
 improve the patient's
 quality of life.
